SUMMARY

Proactive and data-driven Computer Science student with a strong foundation in Machine Learning, Deep Learning, and model optimization. Proven ability to transform complex data into high-impact, ML-driven solutions, with growing interest in applying AI to healthcare domains such as mental-health NLP, emotion detection, and conversational agents. Looking for an AI/ML Engineer Intern role to develop, optimize, and integrate intelligent systems into real-world products.

EDUCATION

Le Quy Don High School

High school student

Sep. 2023 – June. 2026 (Expected)

Ho Chi Minh City, Vietnam

- **Coursework:** Completed 8 Data Science and Machine Learning courses from HCMUS–VNU.
- **Achievements:** Outstanding Student Honoree (Top 15%) at Le Quy Don High School — recognized for academic excellence and student performance.
- **Activities & Leadership:** Served as President of the Science & Technology Club at Le Quy Don High School for three consecutive years (2023–2026), leading club activities, STEM events, and student initiatives.

University of Technology Sydney

Incoming Undergraduate UTS, B.E.Hons in Software Engineering

Feb. 2027 – Feb. 2031 (Expected)

Sydney, Australia

TECHNICAL STACKS

- **Programming Languages:** Python, JavaScript, C++
- **ML/DL Frameworks:** PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers
- **Computer Vision:** OpenCV, YOLOv8, EasyOCR, Tesseract, MediaPipe
- **NLP & LLM:** LangChain, FAISS
- **Backend & Deployment:** FastAPI, Flask, Docker, REST APIs
- **Data & Visualization:** Pandas, NumPy, Matplotlib, Plotly
- **Tools & Platforms:** Git, Linux, Jupyter, Google Colab, Kaggle

EXPERIENCE

AI Engineer & Researcher

AIoT Lab VN

Aug. 2025 – Present

Ho Chi Minh City, Vietnam

- **Designed, trained, and deployed** AI-driven image analysis pipelines for multimodal data ingestion, preprocessing, and annotation, lesion detection, systemic disease classification, and quality assessment, and integrated solutions into secure, user-friendly mobile and web applications with on-device inference.
- **Collaborated** with faculty advisors and peer researchers to define research hypotheses, design experiments and analyze results and presented findings at university symposiums and national student conferences, earning multiple academic awards and merit-based scholarships.

PROJECTS

SmartBites - Intelligent Nutrition Assistant | Personal Project

[View Project](#)

- **SmartBites** is developed with Next.js, TypeScript, and cutting-edge technologies, demonstrating professional software development capabilities and deep knowledge of AI/ML
- **Applied** convolutional neural networks (CNNs) with YOLO models to perform food recognition and estimate nutritional value based on image analysis.
- **Integrated** large language models (LLMs) with retrieval-augmented generation (RAG) pipelines to deliver personalized dietary consultations tailored to individual user profiles.
- **Launched and tested** the platform within my school community, reaching **315 users** with an **85%** daily retention rate and driving a **63%** increase in healthier food choices.

- **Designed and deployed** a dual-stage AI system using CNN14 and Audio Spectrogram Transformers (ASTs) for baby cry detection and cause classification across 8 categories.
- **Curated and augmented** a dataset of **1,100+ infant cry recordings**, achieving **84.9%** accuracy and a **0.746** macro F1-score.
- **Implemented** a two-stage “gatekeeper” architecture that reduced false positives by filtering environmental sounds before downstream cry-reason analysis.
- **Built** a scalable FastAPI backend and cross-platform mobile interface supporting real-time audio inference, RESTful APIs, and interactive analytics dashboards.

- **Engineered** a scalable full-stack system with RESTful APIs, embedding-based recommendation pipelines, and interactive analytics dashboards.
- **Designed** a hybrid matching framework combining **NLP-driven semantic similarity**, **Technology Readiness Level (TRL)** compatibility, and innovation-oriented metadata for intelligent research–industry alignment.
- **Authored and presented** the final report in ATAC Conference, **translating** technical findings into clear narratives for academic evaluation.
- **Achieved** superior recommendation accuracy with a Precision@3 score of **0.74**, significantly outperforming traditional keyword-based (**0.44**) and purely semantic (**0.59**) methods.

HONORS & AWARDS

• 1st Place in “Jeu Parle Francais” Game Hackathon, OIF – National Round	2025
• 1st Place in G-College Hackathon, Singapore	2024
• Special prize in GSS Competition, International University, VNU	2024
• Consolation prize in Tin Hoc Tre Competition – National Qualification	2025

LANGUAGES

English: IELTS (Overall: 7.0) — **Vietnamese:** Native.
